

I'm not robot!

371.1.0.12.107 Jul 29th, 2022 371.0.0.11.107 Jul 27th, 2022 371.0.0.0.10 Jul 15th, 2022 368.0.0.12.109 Jul 8th, 2022 367.0.0.9.112 Jun 29th, 2022 366.0.0.10.107 Jun 23th, 2022 Facebook Messenger for Windows is a free application available for download on any personal computer. It had been integrated within the Facebook platform itself and developed in 2012 as a separate app. After years of adding features and whittling them back down, Messenger has achieved a happy medium. The application runs great on a laptop because it requires a lot of data which might burden a mobile device. A great way to make yourself available to your community. Features FB communication can be done in a variety of ways. The app offers audio clips, images, video, emojis, and stickers to send to your pals. Amazingly, users may transfer money through the chat app if he or she chooses to register their bank account information on the app. The developers have not stopped there. The app allows for VoIP and live video chat one-on-one and in groups as well. Group chat is also on offer for persistent chats among up to 10 users. Messenger's chatbots provide information or receive action commands when you type with them. You find them through the search bar. Rather disappointingly, the utility of these chatbots is diminished by the fact, each one is designed for a specific function. I believe this makes it needlessly difficult to discern what powers they hold. Messages on the app are transmitted through encryption keys that are managed by Facebook. Ostensibly Facebook or government officials can obtain those messages if garnered through the proper legal channels. Facebook offers an extra layer of privacy protection through the Secret Conversations mode. Secret Conversations use the Signal system to transfer end-to-end fully encrypted messages and enable the timer to set an expiration date on the message. The message will then be deleted forever. The black bar across the top of the screen imbues on the user the secrecy of this texting mode. Otherwise, the experience feels like a simpler version of the normal chat mode. Secret Conversation mode still allows the user to send text, stickers, videos, photos, and location. Facebook's brand made it the most popular social media platform in the world. This leads to FB messenger's best feature: everyone is already on it! There is no need to goad your friends and family into downloading a new app. If by chance they are not on Facebook, the app can send SMS messages to anyone's phone number easily. Third-party apps don't always take to FB Messenger very well. But, sometimes these apps offer a feature that completes the already impressive catalog of emoji, stickers, GIFS, and other media products. Messenger is ahead of the curve in another domain. The chat app is prioritizing interoperability between other famous chat products. This means users can send messages directly to WhatsApp and Instagram users. This feature will keep Messenger abreast of the latest developments in the chat app space which should boost your confidence in its use. The app has a great look to it as well. The icons are appealing and conversations are neatly stacked to the side, ready to be drawn up at any time. The application is stable, fun and has a large audience. These are great features in a chat application. Where can you run this program? This software is available for download on any PC that operates using Windows operating system. Facebook.com has a link that will download the messenger app to your desktop. Is there a better alternative? Messenger even still after 2018 is a large app which uses a lot of data and RAM and battery life. FB Developers have recognized this issue and provided a more nimble and less intrusive application. Messenger has the same interface and support. WhatsApp is there to put a smile to a friend's face. This app is home to customizable fonts, gifs, emojis, and stickers. Its interface is tooled to keep pace in the flow of an enjoyable conversation. Google Hangouts product has been a venerable bulwark in the communication apps space. Google Hangouts remains a popular and suitable chat application for millions. Built on a concise and powerful software, Hangouts became Google's most utilized chat application. This will all be changing in the near future, however, Hangouts is experiencing a transition period that will culminate in its eventual abandonment. For the time being, Hangouts will remain a stable and efficient chat application through October 2019. On a desktop, however, all the media products available for sharing on Facebook Messenger run more smoothly. Facebook Messenger is an excellent messenger app for the simple reason that everyone is on it! Should you download it? Yes. Messenger for Windows should be welcomed by anyone using a PC that runs Windows software. Grandparents immediately spring to mind. Older generations often use PC desktops. If not for Messenger on Windows, this population would likely not be able to use the product at all, because they may not have a mobile device to download the app. The product is ideal for anyone who uses their PC throughout the day and

inds themselves constantly picking up their phone to check it out. The article also describes what work in an office would not be tolerated. These people also have to keep their mobile device or their computer. Free Download for WindowsFree Download for WindowsFree Download for WindowsFree Download for WindowsFor a seamless way to message your family and friends, you need the free chat apps available across multiple platforms. Ideally, on both mobile and desktop. So, what free cross-platform chat apps should you download? And what are the best instant messaging apps available today? Keep reading to find out. 1. WhatsApp Despite the Facebook buyout and concerns over advertising, WhatsApp remains the world's most popular messaging app by some distance. At the time of writing, it has more than 2.5 billion monthly active users, and the growth is showing no signs of slowing down. But what about cross-platform chatting? Well, WhatsApp has apps in both the Google Play Store and Apple App Store. There's also a web app (which you need a QR code to log into), and standalone desktop apps for both Windows and Mac. Unfortunately, there is no Linux version of WhatsApp. Other notable WhatsApp features include voice and video chat, groups with up to 256 people, and end-to-end encryption on all messages. Download: WhatsApp (Free) 2. Telegram Windows users will be curious to know about the best messaging apps for PC. Out of all of the options, we think Telegram provides the best Windows client. The app is extremely lightweight, fast, and packed with all the same features that you get on the mobile versions. And, unlike WhatsApp, you don't need a QR code in order to log in—your phone number is sufficient. Uniquely, Telegram even offers a portable Windows app: you don't need to install it on your PC and can use it on any Windows machine you're working on. Telegram has a macOS client and apps for Android and iOS. It is also the first free chat app on this list to support Linux. Some of the most useful Telegram features are its support for self-destructing messages, groups with up to 200,000 members, bot integration, and the ability to schedule messages for the future. Download: Telegram (Free) 3. Facebook Messenger Like WhatsApp, Facebook Messenger benefits from having a large user base. After all, any instant messaging app is useless if the people you want to chat with most frequently don't also have the app installed. Facebook Messenger has standalone apps for Android and iOS. They also have an app for Windows, which looks and acts similarly to the mobile versions. However, Facebook has not developed a standalone desktop Messenger app for Linux or macOS, so you'll have to use the web app if you're running them. Download: Facebook Messenger for Android | iOS | Windows (Free) 4. Line Line is one of the most popular communication apps in Asia. It is the market leader in Japan, Thailand, Indonesia, and Taiwan. If you have friends and relatives in those locales, Line is a must-have free chat app. Thankfully, Line also boasts impressive cross-platform support. There are Line apps available for PC, macOS, Android, and iOS. You can also install the Line Chrome extension if you want to send instant messages directly from your web browser. In addition to its chat functionality, Line doubles as a video messaging app and real-time location sharing service. You can even use it to follow other accounts, such as those of brands, celebrities, pop stars, sports teams, and more. Download: Line (Free) 5. WeChat WeChat is the third most popular messaging app in the world behind WhatsApp and Facebook Messenger. If you want a free chat app to talk to people in China, this is a good solution. It is the top instant messaging app in that country. It is also another free chat app with solid cross-platform support—you can find standalone WeChat versions on Android, iOS, and desktop. However, although WeChat offers messaging apps for Windows and macOS, there is no Linux version. If you are running a Linux distro, you will need to use the service's web app to chat with your friends. Some of the other top features on WeChat include video messaging, custom stickers, a "Moments" stream (akin to Instagram Stories), and real-time location sharing. Download: WeChat (Free) 6. Threema Threema is a highly secure app that is open source and uses end-to-end encryption. All the servers are in Switzerland, meaning it can take advantage of the outstanding consumer protection laws in the country (unlike apps in the US, which are all subject to the CLOUD act). The app is also an outstanding choice for businesses thanks to its enterprise-specific offering, Threema.Work. It includes user management, app configuration, and administration options for IT teams. There is even a self-hosted solution for highly security-conscious companies. Threema is available on Android, iOS, Windows, macOS, Linux, and via the web. It carries a one-time fee of \$4. Download: Threema (\$4) 7. Viber The next app on our list of free chat apps is Viber. It's often thought of as a direct competitor to WhatsApp. But while they do share some similar features (such as end-to-end encryption, voice and video calls, private group chats, and integration with Google Assistant and Siri), there are some key differences. For example, Viber has a feature called Viber Out. It's a VOIP facility that allows you to call mobiles and landlines around the world. You can also follow public accounts and chats, create hidden chats, and even play games within the Viber app. Regardless of the differences, Viber remains a popular instant chat service. It has cross-platform support, with apps available on Windows, Mac, Android, and iOS. Like WhatsApp, there's also a web app that requires a QR code to log in. Download: Viber (Free) 8. Signal Signal is one of the most versatile free chat apps; it has versions available for Windows, Mac, Linux, Android, and iOS. With a focus on privacy, Signal has earned a loyal band of followers over the years. Edward Snowden, Jack Dorsey, and Bruce Schenier have applauded its privacy, its open-source nature, its useability, and its stability. Features include unlimited group sizes, end-to-end encryption, and a "note to self" tool. Download: Signal (Free) 9. Wickr Me If you're looking for even more security from your chat app, check out Wickr Me. It is famed for offering security features that are not found among any of its competitors. For example, there's no need to enter a phone number or any ID information to get started, it offers a built-in VPN, all messages self-destruct after six days, and there's a "shredder" feature that automatically overwrites deleted messages to make them unsalvageable. Download: Wickr Me (Free) 10. Tox Tox is a distributed, peer-to-peer, instant messaging app. That means no single entity is in control of its data or its availability. The Tox protocol hosts all the encryption and chat facilities, but users can make their own front-end apps. That means that all the desktop and mobile operating systems have Tox versions available. Download: Tox (Free) Are These the Best Free Chat Apps? When you're deciding on the best free chat app for your needs, there are two primary points you need to consider. First, can you use it on the hardware you own? Second, are the people you want to talk to also using the service? If any of the above fit your needs, great. If not, let us know your favorite alternatives by reaching out on social media.
